

DAWN Protected Data User Agreement (V1.1)

The Domain Awareness Waggle Network (DAWN) project is funded by the National Nuclear Security Administration's (NNSA) Defense Nuclear Nonproliferation Office of Nonproliferation Research and Development (NA-22) (award ANL20-DAWN-PD3Ja). Large majority of DAWN data must be protected, such as images, LiDAR, gamma, and node telemetry. All DAWN data not explicitly published as open data with a Creative Commons license, is considered DAWN protected data. To gain access to DAWN protected data ("Protected Data"), you must accept and abide by the terms of this user agreement.

1. The Protected Data is provided for research purposes only, and may not be used for commercial activities.
2. DAWN reserves the right, in its sole discretion, to distribute the Protected Data to others and to use it for its own purposes.
3. I shall not distribute, share, publish or release the Protected Data to any person not authorized by this agreement, other than the personnel under my direct supervision. I will ensure that all personnel under my direct supervision accessing the Protected Data follow this User Agreement.
4. The Protected Data may not be used for identifying, locating, or tracking any specific individual. No software or algorithms may be developed with the Protected Data to detect specific individuals, or to build other capabilities that might reasonably be interpreted as surveillance of human subjects.
5. Data from DAWN devices installed by the City of Chicago must comply with the Array of Things Privacy Policy (<https://arrayofthings.github.io/final-policies.pdf>)
6. I may use representative samples of the Protected Data in public publications or presentations, provided that all personal identifying information is redacted.
7. I agree to keep DAWN informed of any software or algorithm work using Protected Data, that in my best judgment may have cybersecurity or privacy implications.
8. I shall have no rights to the Data other than as provided in this Agreement, and at the request of DAWN, I shall delete all Protected Data under my control.
9. In any publications or presentations that use Protected Data, I will include the most recent and appropriate scientific citation, as recommended by the DAWN project.
